Welcome to PromptEmpire

You are holding the most practical AI business toolkit ever assembled. These 500+ prompts are not random — every one was built to solve a real business problem. Generating leads. Closing sales. Building systems. Scaling faster than the people who are still typing every prompt from scratch.

Whether you are a solopreneur, freelancer, agency owner, or operator running multiple brands, this pack will save you hours every week and produce professional-grade output in minutes.

How to get the most out of this pack

1. **Replace every bracket.** Every **[BRACKET]** is a variable. Replace it with your specific information. The more detail you add, the better the output.
2. **Use the right LLM.** These prompts work with Claude (claude.ai), ChatGPT (chat.openai.com), Gemini, and any modern LLM. Claude tends to excel at writing; ChatGPT at structured output; Gemini at research-heavy tasks.
3. **Iterate. Do not one-shot.** Not quite right? Add: 'Make it more [tone]' or 'Shorter' or 'Add more examples.' Prompts are conversations, not one-shots.
4. **Build your own library.** Copy your favorites into a Notion database or Google Doc. Over time, build the prompt library that fits your specific business — that compound asset is worth more than this PDF.
5. **Combine sections.** The magic happens when you combine sections. Use Section 2 (Sales) prompts to supercharge your Section 4 (Email) sequences.

License: Personal and business use by the purchaser. You may use these prompts to create content, products, and services for sale. You may not resell, redistribute, or share this PDF itself. Thank you for respecting the work.
