Welcome to Your Command Center

Most freelancers run their business from a mix of sticky notes, spreadsheets, email threads, and memory. It's chaotic. It's stressful. And it costs you money — in missed invoices, forgotten follow-ups, and time spent looking for things instead of doing them.

The Freelancer Command Center is a complete Notion workspace that replaces all of that with one organized, interconnected system. Every client, project, invoice, proposal, and task — in one place, beautifully structured.

WHAT'S INCLUDED IN THIS SYSTEM:

- | | |
|---------------------------|---|
| ■ Client Hub | Track every client, contact, contract value, status, and relationship notes |
| ■ Project Pipeline | Kanban + calendar view of every project from prospect to delivered |
| ■ Invoice Tracker | All invoices with amounts, due dates, paid/overdue status, and totals |
| ■ Time Log | Log hours per project and client with automatic revenue calculations |
| ■ Proposals Hub | Template library + status tracking for every proposal you send |
| ■ Weekly Review | Recurring check-in template to review wins, revenue, and priorities |
| ■ Resources Vault | Contract templates, rate card, tools list, and quick-access links |

PART 1: SETUP GUIDE

1 Create a Free Notion Account

- Go to notion.so and sign up for free (free plan is enough for everything in this system)
- Download the Notion desktop app for the best experience (optional but recommended)
- Create a new page in your workspace called 'Freelancer Command Center'

2 Create Each Database (7 total)

- In Notion, click + New Page → then choose 'Table' for each database
- Name each one exactly as shown in this guide (Part 2) — names matter for relations
- Add properties to each database following the schema in Part 2
- Take your time — setup takes about 20-30 minutes, then it runs forever

3 Connect the Databases with Relations

- Notion 'Relation' properties link databases together (like a join in SQL)
- After creating all 7 databases, go back and add the relation properties as shown
- This is what makes the system powerful — a client shows their projects AND invoices

4 Add Rollup Properties

- Rollup properties pull summary data across relations (e.g., total invoiced per client)
- Add these AFTER setting up relations — they depend on the relation being there first

5 Create Views

- Each database should have multiple views: Table, Board (Kanban), Calendar, Gallery
- Follow the view setup in each database section below
- Views don't change data — they're just different ways to look at the same database

6 Set Up Your Home Dashboard

- Create a new Notion page called 'HOME'
- Use `/linked` to create 'Linked Database' views that pull from each database
- This becomes your daily dashboard — all key info in one place at a glance

7 Duplicate to Share (For Resale)

- Once built, go to your Command Center page → click '...' menu → 'Share'
- Turn on 'Share to web' and enable 'Allow duplicate as template'
- Copy the share link — this is your Gumroad product URL that buyers duplicate

The master record for every client — past, present, and prospect.

■ DATABASE 1: Client Hub

■ Recommended Views:

- › Table (default)
- › Kanban by Status
- › Gallery (client cards)
- › Filter: Active clients only

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Client Name	Title	The client's name or company name	Acme Corp
Status	Select	Active / Prospect / Past / On Hold / Lost	Active
Industry	Select	Tech / Marketing / Finance / Health / Legal / Other	Tech
Primary Contact	Text	Full name of main contact person	Jane Smith
Email	Email	Client's primary email address	jane@acme.com
Phone	Phone	Client's phone number	+1 555 123 4567
Contract Value	Number	Total value of current contract (format: USD)	\$5,000
Hourly Rate	Number	Agreed hourly rate if applicable	\$150
Contract Start	Date	When the client relationship started	Jan 1 2026
Contract End	Date	Contract end date (if fixed term)	Dec 31 2026
Projects	Relation	Links to Project Pipeline database	→ shows all projects
Invoices	Relation	Links to Invoice Tracker database	→ shows all invoices
Total Invoiced	Rollup	Sum of all invoice amounts for this client	\$12,500
Total Paid	Rollup	Sum of paid invoices only	\$10,000
Outstanding	Formula	Total Invoiced minus Total Paid	=prop('Total Invoiced')-prop('Total Paid')
Active Projects	Rollup	Count of projects not marked Done	3
Last Contact	Date	Date of last communication	Apr 15 2026
Notes	Text	Relationship notes, preferences, key info	Prefers Slack

Referred By	Text	Who referred this client	Marcus T.
Tags	Multi-select	VIP / Long-term / Referral Source / Difficult	VIP, Long-term

Every project you're working on or have worked on, from pitch to delivery.

■ DATABASE 2: Project Pipeline

■ Recommended Views:

- › Kanban by Stage (main view)
- › Table (admin view)
- › Calendar by Deadline
- › Filter: In Progress
- › Filter: This Month

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Project Name	Title	Clear descriptive name for the project	Website Redesign Q2
Client	Relation	Links to Client Hub — which client is this for	→ Acme Corp
Stage	Select	Prospect / Scoping / In Progress / Review / Delivered / On Hold	In Progress
Project Type	Select	Design / Development / Copy / Strategy / Consulting / Other	Design
Start Date	Date	When work begins	Feb 1 2026
Deadline	Date	Hard delivery deadline	Mar 31 2026
Project Value	Number	Total value of this project in USD	\$3,500
Hours Estimated	Number	Estimated total hours to complete	25
Hours Logged	Rollup	Auto-sum from Time Log database	18
Hours Remaining	Formula	Estimated minus logged	=prop('Hours Estimated')-prop('Hours Logged')
Completion %	Select	0% / 25% / 50% / 75% / 90% / 100%	75%
Invoices	Relation	Links to Invoice Tracker	→ shows project invoices
Total Billed	Rollup	Sum of invoice amounts for this project	\$2,500
Balance Due	Formula	Project Value minus Total Billed	=\$1,000
Priority	Select	Low / Medium / High / Urgent	High
Description	Text	Project brief, deliverables, scope	Full website redesign...

Drive/Files Link	URL	Link to Google Drive or Dropbox folder	drive.google.com/...
Contract Link	URL	Link to signed contract	docusign.com/...
Notes	Text	Internal notes, blockers, updates	Client approved mockups

Every invoice you've ever sent, with real-time payment status.

■ DATABASE 3: Invoice Tracker

■ Recommended Views:

- › Table (default)
- › Kanban by Status
- › Filter: Unpaid
- › Filter: Overdue
- › Gallery by Client

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Invoice #	Title	Sequential invoice number	INV-2026-047
Client	Relation	Links to Client Hub	→ Acme Corp
Project	Relation	Links to Project Pipeline	→ Website Redesign
Invoice Date	Date	Date invoice was sent	Mar 15 2026
Due Date	Date	Payment due date (typically Net 30)	Apr 14 2026
Amount	Number	Total invoice amount in USD	\$1,750
Tax Amount	Number	Tax if applicable	\$0
Total Due	Formula	Amount + Tax Amount	\$1,750
Status	Select	Draft / Sent / Paid / Partial / Overdue / Disputed / Void	Sent
Paid Date	Date	Date payment was received	—
Amount Paid	Number	Amount received (may differ if partial)	\$0
Balance	Formula	Total Due minus Amount Paid	\$1,750
Payment Method	Select	Bank Transfer / PayPal / Stripe / Check / Cash / Crypto	—
Invoice Link	URL	Link to actual invoice (Wave, FreshBooks, PDF)	—
Notes	Text	Payment notes, disputes, follow-up history	Reminder sent Apr 5
Days Overdue	Formula	If status = Overdue, calculate days past due	Formula: see guide

Services	Text	Line items / what was charged for	UI Design, 10hrs @ \$150
----------	------	-----------------------------------	--------------------------

Track hours on every project. Know your true hourly rate. Bill accurately.

■ DATABASE 4: Time Log

■ Recommended Views:

- › Table (default)
- › Filter: This Week
- › Filter: By Project
- › Grouped by Client

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Entry	Title	Brief description of what was worked on	Homepage design - hero section
Project	Relation	Which project is this time for	→ Website Redesign
Client	Rollup	Auto-pulls from Project relation	→ Acme Corp
Date	Date	Date work was done	Apr 15 2026
Start Time	Text	Time work started	9:00 AM
End Time	Text	Time work ended	11:30 AM
Hours	Number	Duration in hours (decimals OK: 1.5 = 90 min)	2.5
Hourly Rate	Number	Rate for this entry (can vary by project)	\$150
Billable	Checkbox	Is this time billable to the client?	✓
Billed	Checkbox	Has this time been included in an invoice?	■
Revenue	Formula	Hours × Hourly Rate (if Billable = true)	\$375
Type	Select	Design / Development / Strategy / Admin / Revision / Meeting	Design
Notes	Text	Additional context about the work	Implemented feedback from review call

Track every proposal sent — win rates, response times, and follow-ups.

■ DATABASE 5: Proposals Hub

■ Recommended Views:

- › Kanban by Status
- › Table (default)
- › Filter: Open proposals
- › Filter: Won this month

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Proposal Name	Title	What the proposal is for	Brand Identity Package — Startup X
Client / Prospect	Relation	Links to Client Hub	→ Startup X
Date Sent	Date	When the proposal was sent	Apr 10 2026
Expiry Date	Date	When the proposal expires	Apr 24 2026
Proposed Value	Number	Total value of the proposed project	\$4,200
Status	Select	Draft / Sent / Viewed / Negotiating / Won / Lost / Expired	Sent
Win Probability	Select	Low / Medium / High / Near-Certain	High
Decision Maker	Text	Who approves the project	CEO / Marketing Director
Follow-up Date	Date	When to follow up if no response	Apr 17 2026
Proposal Link	URL	Link to proposal doc (DocSend, PDF, Notion)	notion.so/...
Lost Reason	Select	Price / Timing / Competitor / No Response / Scope	—
Notes	Text	Call notes, objections, negotiations	They loved the concepts
Source	Select	Referral / Inbound / Cold Outreach / Repeat Client / Platform	Referral

A recurring weekly check-in to track progress, revenue, and priorities.

■ DATABASE 6: Weekly Review

■ Recommended Views:

› Table sorted by Date (newest first)

› Gallery view

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Week Of	Title	Week identifier	Week of Apr 28, 2026
Date	Date	Monday of that week	Apr 28 2026
Revenue This Week	Number	Total invoices paid this week	\$2,350
Hours Worked	Number	Total hours logged this week	32
Effective Rate	Formula	Revenue / Hours = effective hourly rate	\$73.44
New Clients	Number	New clients acquired this week	1
Proposals Sent	Number	Proposals sent this week	2
Proposals Won	Number	Proposals closed/won this week	1
Top Win	Text	Best thing that happened this week	Landed Acme retainer
Top Challenge	Text	Biggest problem or obstacle	Scope creep on Project X
Next Week Priority 1	Text	Most important task next week	Deliver homepage design
Next Week Priority 2	Text	Second priority next week	Send invoice to Client Y
Next Week Priority 3	Text	Third priority next week	Follow up on 3 proposals
Energy Level	Select	1-Burned Out / 2-Low / 3-OK / 4-Good / 5-Excellent	4-Good
Revenue Goal Progress	Formula	Track toward monthly target	See formula guide
Notes & Reflections	Text	Free-form notes, lessons learned	

Your permanent reference library — contracts, templates, tools, rates.

■ DATABASE 7: Resources Vault

■ Recommended Views:

› Table by Category

› Gallery view

PROPERTY NAME	TYPE	PURPOSE	EXAMPLE
Resource Name	Title	Name of the resource	Standard Freelance Contract
Category	Select	Contract / Template / Tool / Rate Card / Process / Reference	Contract
Type	Select	Document / Link / Template / Script / Checklist	Document
Link	URL	URL or file link to the resource	notion.so/contract-template
Description	Text	What this resource is and when to use it	Use for all new clients
Tags	Multi-select	Legal / Finance / Marketing / Client-Facing / Internal	Legal, Client-Facing
Last Updated	Date	When this was last reviewed/updated	Jan 2026
Status	Select	Current / Outdated / Draft / Archived	Current

HOME DASHBOARD

The Home Dashboard is a single Notion page that shows you everything that matters at a glance. It uses 'Linked Database' views to pull live data from each database without duplicating anything.

■ TOP METRICS ROW

- Use 4 'Callout' blocks in a row (use /columns to create a 4-column layout)
- Callout 1: Monthly Revenue (manually updated, or use a formula from Invoice Tracker)
- Callout 2: Active Projects (linked view count filter)
- Callout 3: Outstanding Invoices (linked view sum)
- Callout 4: Open Proposals (linked view count)

■ ACTIVE PROJECTS (Linked View)

- Use /linked database → select Project Pipeline
- Filter: Stage = 'In Progress' OR 'Review'
- Show: Project Name, Client, Deadline, Completion %, Priority
- Sort by: Deadline (ascending)

■ UNPAID INVOICES (Linked View)

- Use /linked database → select Invoice Tracker
- Filter: Status = 'Sent' OR 'Overdue'
- Show: Invoice #, Client, Amount, Due Date, Status
- Sort by: Due Date (ascending) — overdue first

■ THIS WEEK'S TASKS (Simple list)

- Create a simple bulleted list or use a Todo database
- 3-5 priorities for the week — updated every Monday
- Link each to the relevant Project or Client record

■ PIPELINE OVERVIEW (Linked View)

- Use /linked database → select Proposals Hub
- Filter: Status = 'Sent' OR 'Negotiating'
- Show: Proposal Name, Proposed Value, Win Probability, Follow-up Date

Copy-Paste These Into Notion Formula Properties

KEY FORMULAS

FORMULA NAME	WHERE TO ADD IT	FORMULA CODE
Invoice Outstanding Balance	Invoice Tracker → Balance property	<code>prop("Total Due") - prop("Amount Paid")</code>
Days Overdue	Invoice Tracker → Days Overdue property	<code>if(prop("Status") == "Overdue", dateBetween(now(), prop("Due Date"), "days"), 0)</code>
Project Hours Remaining	Project Pipeline → Hours Remaining	<code>prop("Hours Estimated") - prop("Hours Logged")</code>
Time Log Revenue	Time Log → Revenue property	<code>if(prop("Billable"), prop("Hours") * prop("Hourly Rate"), 0)</code>
Effective Hourly Rate	Weekly Review → Effective Rate	<code>if(prop("Hours Worked") > 0, round(prop("Revenue This Week") / prop("Hours Worked") * 100) / 100, 0)</code>
Proposal Days Until Expiry	Proposals Hub → add 'Days Left' property	<code>dateBetween(prop("Expiry Date"), now(), "days")</code>
Project Balance Due	Project Pipeline → Balance Due	<code>prop("Project Value") - prop("Total Billed")</code>

Ready to Paste — Sell This Template

GUMROAD LISTING COPY

Once you've built the template in Notion and created a duplicate link, use the product listing below to sell it on Gumroad:

[illegible]

You're Ready to Build.

Build the template once. Sell it forever.

1	Open Notion	notion.so (free)
2	Build the 7 databases	Follow Part 2 of this guide
3	Add relations + formulas	Use Part 3 formulas above
4	Build your Home Dashboard	Follow the dashboard section
5	Share as template	Settings → Share → Allow duplicate
6	Upload link to Gumroad	Use the listing copy above
7	Start selling	You're live — go get paid

Bundle this with the 500+ AI Business Prompts for \$67 — your full Empire Bundle.
promptempire.gumroad.com

Continue your build.

You just used the Freelancer Command Center.
If it saved you time, the rest of the PromptEmpire line will multiply it.

500+ AI Business Prompts
